

## Z21 Booster Adapter

Art. No.: 10789

€43,90

The Booster Adapter is used to be able to connect up to 15 boosters with CDE interfaces to the booster bus. An X-bus port is provided to supply voltage to the adapter. Status LEDs display the 12-V supply as well as an active CDE end stage; besides, the adapter has an overcurrent or short-circuit protector at the CDE output.

The booster adapter can be used on the following central units or amplifiers:

- Digital amplifier (10764)
- multiZENTRALEpro (10832)
- z21 and z21 start
- Z21 (10820, 10822)

Intended purpose:

If the power of our booster is not sufficient (e.g. major railway companies, 0–IIm track), you can connect a strong CDE booster (e.g. Massod, Lenz, Tams) using the CDE adapter to the booster bus of our central units or amplifiers.

Contents:

- Booster Adapter
- Connection cable
- Operation manual
