

Heavy duty flat wagon, DB

Epoch:

Art. No.: 845601

Heavy duty flat wagon type Rlmmps of the Deutsche Bundesbahn (DB)

- Model with true to original livery and lettering

The term heavy duty flat wagon is nowadays only known colloquially, as you can no longer find its equivalent in the international classification of goods wagons according to the UIC. It is a commonly used term to describe a relatively short flat bogie wagon with a flat wagon floor for the transportation of heavy loads such as machinery, tanks or slabs.
