

Electric locomotive Ae 610 SBB (Cargo)

Epoch:

Art. No.:

Electric locomotive Ae 610, SBB (Cargo), Ep. VI.

Technically revised mode.

Model equipped with in-built load sensing digital decoder and true to the original sound functions from factory.

- Swiss light change
- Triple LED headlights that change with the direction of travel
- Close coupler motion link
- Digital interface
- Closed front apron for optional mounting included

In 1955 the success story of the series Ae 6/6 began and 120 locomotives were delivered to the SBB. The Ae 6/6 proved perfect for the quick transportation of the rapidly growing goods accumulation, particularly at the long steep ramps of the Saint Gotthard's pass. At that time the slow "Crocodiles" which operated on the frequently used lines were too slow and therefore lost too much time. So the shapely Ae 6/6 power pack easily replaced the "Crocodile" and other older locomotives on all inclined main lines.

The Ae 6/6 achieved cult status during the last years of operation. After the decommissioning from the active service at the SBB, several locomotives have been preserved in museums for the next generations.

Specifications:

General data

Coupling	NEM shaft 355 with close coupling mechanism
Number of driven axles	4
Traction tyres	2
Flywheel	yes

Electrical

Head light	Light changes true to the Swiss original - direction dependent
------------	--

Electrical

Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.
Digital decoder	DCC
	On-Board
Decoder mode	DCC
Sound	yes
LED head light	yes

Measurements

Length over buffer	115 mm
--------------------	--------
