

Steam locomotive type Pt 2/3, K.Bay.Sts.B.

K. Bay. Sts. B.

Epoch: I

14+

Art. No.: 707005

Tender locomotive Pt 2/3 of the Royal Bavarian State Railways. Epoch I.

The loco is driven by a maintenance-free high performance motor with flywheel. Modified chassis with wiped bearing. Metall die-cast housing. The model features many free-standing grab irons and separately applied plug-in parts. LED double headlights that switch with the direction of travel.

Prototype: The Royal Bavarian State Railways (K.Bay.Sts.B.) was founded 175 years ago. With a railway network of 8526 kilometers, the K.Bay.Sts.B. became at the end of World War I, the second largest German Länderbahn after the Prussian State Railways. (The length of the entire network also included the lines of the Pfälzische Eisenbahnen which were taken over on January 1, 1909). After the end of the monarchy on November 8 1918, the predicate "Royal" was removed from the name of the State Railways. Fleischmann invites all model railway fans to join the celebrations in 2019, when it will launch many special series with interesting, colourful vehicles from the large Bavarian Länderbahn era.

Specifications:

General data

Number of driven axles	2
Coupling	NEM shaft 355 without close coupling mechanism
Flywheel	yes

Electrical

Head light	Direction dependent dual headlights
Motor	Special motor
LED head light	yes

Measurements

Length over buffer	58 mm
