

Electric locomotive class 254, DR

DR

Epoch: IV
14+

Art. No.: 739476 €270,90

Electric locomotive class 254 of the Deutsche Reichsbahn (DR-Ost). Epoch IV.

Model equipped with in-built load sensing digital decoder and true to the original sound functions from factory.

Motor with flywheel. Drive on four axles. Traction tyres. Coupler pocket according to NEM 355 and close coupling mechanism.

Prototype: The electric locomotives of the BR E 94 that had remained in the DR after the war were disrespectfully called "Eisenschwein" (iron pig). No matter that they were the backbone of the goods traffic in the DR for the longest time. The apparent difference to the DB version were the red painted bogies. A notable difference to the DB version were the bogies painted in red. The locomotives operated for the DR until 1990.

Specifications:

General data

Number of axles with traction tyres	2
Number of driven axles	4
Coupling	NEM shaft 355 with close coupling mechanism
Minimum radius	192 mm
Flywheel	yes

Electrical

Digital decoder	DCC
Sound	yes
Decoder mode	DCC
Head light	Digitally switchable dual headlights
LED head light	yes

Measurements

Length over buffer	116
