

Electric locomotive class E 94, DRB

Epoch: II

14+

Art. No.: 739478

€264,90

Electric locomotive class E 94 of the Deutsche Reichsbahn (DRB). Epoch II.

Model in grey livery which features the imperial eagle "Reichsadler".

Model equipped with in-built load sensing digital decoder and true to the original sound functions from factory.

Motor with flywheel. Drive on four axles. Two traction tyres. Coupler pocket according to NEM 355 standards with close coupling mechanism. Dual headlights LED that change with the direction of travel.

■ Matching wagons: 820802, 820803 (coal train wagon sets)

Prototype: The enormous traffic growth in the second half of the 1930s required shorter travel times of the passenger and freight trains to relieve the railway lines. After the electrification projects had come to a standstill in the wake of the economic crisis, new plans for the electrification of the main lines were envisaged, of which, however, due to the war, not all were implemented. By the end of 1937, therefore, a supply contract for the development of the new series E 94, on the basis of the E 93, was signed with the company AEG.

Specifications:

General data

Number of axles with traction tyres	2
Number of driven axles	4
Coupling	NEM shaft 355 with close coupling mechanism
Flywheel	yes

Electrical

Digital decoder	DCC
Sound	yes
Decoder mode	DCC
Head light	Direction dependent dual headlights
LED head light	yes

Measurements

Length over buffer	116
