

2 piece set pressure gas tank wagons, NS

Epoch: IV

14+

Art. No.: 849101

€69,90

The set contains two pressure gas tank wagons, type Zags, "Eva/DSM" that operates for the Dutch State Railways.

- Models with short sun protection roof
- Perfectly matches block trains

Pressurized gas tank cars are special vehicles for liquefied, refrigerated or dissolved gases. The loading and unloading takes place via devices that can be operated from the ground (bottom discharge). The eye-catching, about 30 cm high, orange longitudinal stripes in the center of the tank is characteristic for the European wagons. For a long time, these cars operated exclusively as private wagons and were hired by national railway authorities [P]. In the meantime, in contrast to other types of wagons, they are owned by specialized wagon hire companies. The complex wagon fleet management includes maintenance, inspection and more.

Specifications:

General data

Coupling NEM shaft 355 with close coupling mechanism

Measurements

Length over buffer 220 mm
