

Diesel locomotive class 260, DB

Epoch: IV

14+

Art. No.: 722481

€179,90

Diesel locomotive class 260 of the Deutsche Bundesbahn.

Model with integrated load sensing DCC digital decoder.

Update!

- Maintenance-free motor
- LED headlights on both ends of the locomotive
- Spring-loaded middle axle
- Rod made of metal
- Precisely reproduced locomotive "noses"
- Separately applied shunter handles
- Unobstructed view through the driver's cab

The Deutsche Bundesbahn procured the locomotives of the class V 60/V 60.1 from the mid-1950s on, to use them for heavy and light shunting services. The difference between the series V 60 (260) and V 60.1 (261) consists in the higher friction load of the class 261. The machines achieved a top speed of 30 km/h during shunting maneuvers and a line speed of 60 km/h. It has a power output of 478 kW. After the decommissioning of the first locomotives in the 1980s, many of them were delivered to domestic and foreign railway administrations.

Specifications:

General data

Coupling	NEM shaft 355 without close coupling mechanism
Minimum radius	192 mm
Number of driven axles	3
Flywheel	yes

Electrical

Electrical

Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.
Digital decoder	DCC
	MX616
LED head light	yes

Measurements

Length over buffer	65 mm
