

Steam locomotive class 065, DB

Epoch:

Art. No.: 706503

Steam locomotive class 065 of the Deutsche Bundesbahn.

Update!

- Movable Heusinger control
- Brake shoes between the wheels
- Chassis made of metal die-cast material

The series 65 was part of the new construction programme of the Deutsche Bundesbahn and was first delivered in 1951. The locomotive captured with a sturdy and elegant look. She preferably operated as a passenger train locomotive with tender in the suburban and city rail traffic in the Ruhr area. Some machines later received push-pull control. The 18 locomotives reached a top speed of 85 km / h and had a power output of 1.089 kW. The last machine drove onto the siding in 1972.

Specifications:

General data

Coupling	In-house produced coupling
Minimum radius	192 mm
Number of axles with traction tyres	1
Number of driven axles	4

Electrical

Head light	Both sides of the vehicle are equipped with direction independent triple headlights
Interface	No
LED head light	yes

Measurements

Length over buffer	97 mm
